PAIN-X

The Challenge

Most people have some kind of pain and inflammation. The pain signals need to be blocked in the cells from producing prostaglandins, which are made at sites of tissue damage or infection, where they cause inflammation, pain and fever. Also, cyclooxygenase-2 (COX-2) is naturally found in most bodily tissues, but an injured tissue contains more of it.

The COX-2 enzyme, which is a protein made by cells in your body, takes chemicals in your tissues and converts into prostaglandins. When the body is injured (or inflammation occurs anywhere in the body), COX-2 is activated and produces extra prostaglandins, which help the body to respond to the injury. However, an excess of prostaglandins can lead to further problems.

Also, numerous OTC pain relief drugs currently available such as ibuprofen (Motrin® and Advil®) and naproxen (Aleve® and Naprosyn®) can have multiple negative side effects, yet over 100 billion tablets are taken by consumers annually. This is a huge number—almost 3 million tablets per day! Why does this matter? Continual use of OTC and prescription drugs have side effects such as nausea, vomiting, diarrhea, stomach or bowel irritation, bleeding from the stomach and bowel, muscle spasms, damage to liver and kidneys, and risk of long-term addiction.

The Solution

Pain-X solves the problem that's causing pain by reducing the pain signals your nerves send to your brain. Through blocking prostaglandin production, **Pain-X** reduces pain and inflammation. However, sometimes an excess of and chronic production of prostaglandins may contribute to several diseases by causing unwanted inflammation or pain. This natural pain formula, **Pain-X**, binds to COX-2 and prevents it from doing its job like a lock you turn on your door. The door can't open with the lock engaged, just as COX-2 does not work with **Pain-X** bound to it. This formula is different from any other pain control supplement available. Why? One main reason, it is non-addictive and fast-acting. Another main reason, it blends natural COX-2 inhibitors with natural opioid agonists that provide a pain-relieving effect. In other words, **Pain-X strikes down pain!**

PAIN-X

Revolutionary Quick-Acting COX-2 Inhibitor

Pain-X is 100% food supplementation that contains natural nutrients and herbs commonly used for natural, non-addictive pain relief.

Some main ingredient benefits which make up **Pain-X** proprietary formula listed below.

Pineapple – Potent anti-inflammatory and anti-swelling properties • Helps prevent blood clots & edema • Soothes & relaxes tense, inflamed muscles & connective tissue • Relieves sprains, tendonitis, allergies, arthritis, joint pain & osteoarthritis

Ashwagandha – Excellent relief of arthritis including rheumatoid & osteoarthritis • Supports healthy back & joints • Combats neurodegenerative diseases • Soothes the nervous system from the pain response • Potent antibacterial, antitumor, anti-stress, adaptogenic, anti-inflammatory & analgesic effects

Comfrey – Originally called “knitbone” • Clinically proven to relieve pain, inflammation & swelling of muscles & joints due to arthritis, osteoarthritis & gout, acute myalgia in the back, sprains, contusions & strains after sports injuries & accidents • Repairs torn cartilage

Ginger – Anti-inflammatory properties • Relieves joint & muscle pain, including osteoarthritis • Antifungal properties to block bacterial infections • Eases menstrual pain • Combats migraines & headaches

White Willow Bark Extract – Contains salicin--a chemical similar to aspirin • Reduces prostaglandin levels, which decreases pain, aches & inflammation • Eases both acute & chronic pain • Decreases muscle aches • Reduces fever • Relieves back pain & osteoarthritis, headaches & conditions such as bursitis & tendonitis

Black Walnut Hulls – Strong antibacterial, antiviral, antiparasitic & fungicide • Lowers risk of auto-immune disorders such as rheumatoid arthritis • Known as the muscle & nerve food • Restores, strengthens & rebuilds tooth enamel • Strengthens bones & teeth

Turmeric Extract – Powerful anti-inflammatory effects • Very strong antioxidant • Pain-reducing properties • Effective against arthritis including rheumatoid • Reduces severity of premenstrual syndrome (PMS) • Decreases dental pain • Lessens pain of tendonitis

Feverfew – Name means “fever reducer” • Also known as “medieval aspirin” • Anti-inflammatory properties • Relieves pain • Prevents constriction of blood vessels in the brain • Eases muscle spasms • Reduces menstrual cramps

Frankincense-Boswellia serrata – Active constituent in this herb, boswellic acid, is known to show anti-inflammatory benefits • Research trials indicate benefits relieving rheumatoid arthritis

Glucosamine – Anti-inflammatory properties • Fights inflammatory bowel disease (IBD) such as ulcerative colitis • Effective against TMJ, osteoarthritis & rheumatoid arthritis • Excellent joint support • Promotes cartilage strength & mobility • Helps rebuild worn joints, lubricates joints & soothes inflamed joints

MSM (methylsulfonylmethane) – Powerful anti-inflammatory • Highly effective in improving joint flexibility • Helps produce flexible skin & muscle tissue • Makes cells more permeable, which means toxins move out, hydration moves in • Accelerates healing • Naturally increases energy

Chaparral – Blood purifier • Alleviates arthritic & rheumatic pain, stomach pain, chicken pox, snake bite pain, bowel cramps, gas, colds, chronic skin disorders, stomach problems, menstrual disorders, diabetes, gall bladder & kidney stones, diarrhea, urinary tract infections & upper respiratory tract infections
