Brown Recluse Spider Bite

The Necrosis, or rotting of the flesh, caused by the spider venom, is a CHEMICAL REACTION not a virus, bacteria, or infection of any kind. The CHEMICAL REACTION must be stopped, or NUTRALIZED. Then protect from infection setting in, and boost the immune system.

BASIL OIL topically, BASIL tea internally to neutralize the venom. Lavender oil to prevent gangrene.

2 Drops of Lavender oil mixed with 4 Drops of Basil oil. Immediately:

1. Clean wound with peroxide, or soapy water. 2. Put Basil and Lavender oil on cotton pad and tape to wound. Change 3-4 times every day. 3. Drink Basil tea (fresh leaves if possible - 2 Tbs/ cup of hot water) 3-4 times every day.

A paste can be made from Bentonite Clay, Basil oil and Lavender oil, and applied to the bite alternately to the bandage as a poultice, left on at night. Add Plantain tincture to this for quick healing, and to aid in pulling out the venom. Bentonite Clay is also important to take internally to surround and pull out venom toxins from inside the body.

Mix 1 Tbsp. Bentonite Clay with 8 ounces of alkaline water. Mix well, so there are no lumps. Add 1 Tbsp. Psyllium seed, or other fiber, to form bulk to make the Bentonite Clay move through your digestive system.

Other Essential Oils that are helpful are : Oregano oil, Clove oil, Lemon Balm oil, Rosemary oil, and Rose Otto oil.

Drinking Noni Juice is helpful to boost and detoxify the system. Also take high doses of MSM to combat swelling, and high doses of Vitamin C, with Colloidal Silver to boost the immune system.

Another compress that is helpful is a paste of Baking Soda, Charcoal, 1 egg white, 1 Tbsp. Iodine, with grated Cabbage, Plantain leaves, and grated Garlic clove. PUT ON FOR 20 MINUTES AT A TIME. Bentonite, MSM and Silver
Baking Soda Mashed up Plantain Leaves
