

Herb Power 21

The Challenge

People are deprived of the nutrients that are essential for cells to function properly. Our vitamin- and mineral-depleted food supply does not provide the nutrients for these functions.

Normal cells have many functions such as
take in nutrition • maintenance • eliminate waste and toxins

Cells must also protect themselves from
unfriendly bacteria • fungi and viruses • free radicals and
repair damage done by them

Vitamins and minerals in most supplements are made from isolated, industrial chemicals and ground up rocks processed with acids. Those supplements do not contain the protein chaperones or other food factors needed for cellular absorption. These substances actually become toxic chemical residue in cells.

The Solution

The herbs in our flagship product - **Herb Power 21** which has a track record of over 30 years of satisfied customers - contain all known natural vitamins, plus over 30 essential and trace minerals, amino acids and natural proteins, all in food form - NOT isolated, synthetic chemicals. The herbs work synergistically to promote the health and wellness of every cell, organ, and system of the body in a complex wave of high energy.

Other Herb Power 21 Benefits Include

- 100% food • Renders maximum food fuel • Multi-purpose/multi-vitamin/multi-mineral
- Ideal for work outs • Great for everyday lifestyle • Caffeine not needed for waking up

The Testimonies

We have satisfied customers all over the United States taking **Herb Power 21!**

Letcher
