

Super Herbal Body Cleanse

The Challenge

Once a toxic substance has contacted the body, it may have either acute (immediate) or chronic (long term) effects. Toxins cause asphyxiants, which cause depletion of oxygen to the tissues, which causes internal damage.

Most everyone cleans something: their homes, their vehicles. We clean our clothes. Everyone cleans the outside of their bodies. However, the inside of our bodies also gets dirty... toxic dirty! Toxins come from the environment and air pollution. Toxic substances are in the food supply. Toxic chemicals are within the products we use daily.

In the United States, we are exposed to more than 87,000 chemicals banned in over 80 countries. Many of those chemicals metabolize in our bodies as estrogens, which have been shown to cause cancer and other diseases. This means cleansing and detoxing the body becomes paramount.

The Solution

Since our bodies face immense detoxification challenges, **Super Herbal Body Cleanse** was formulated to help improve our body's overall health and wellness, and may even reduce the risk of cancer. This herbal cleanse detoxifies the colon, lymph system and organ, including the brain. It also maintains regularity and causes the digestive system to be more effective.

Other Benefits Include

Promotes weight loss • Improves blood circulation • More restful sleep • Boosts energy
Maintains pH balance in the blood • Body cleansing has been shown to boost brain power --
Who doesn't want that benefit!

Super Herbal Body Cleanse

Your body faces immense detoxification challenges these days. Unlike other cleanses, **Super Herbal Body Cleanse** while cleansing all the organs, nourishes and detoxes your blood, brain, colon and lymph system, helping to improve your body's overall health, and even reducing your risk of colon cancer. This body cleanse helps prevent constipation and diarrhea by balancing hydration in the digestive tract, promoting more effective and regular digestion. It promotes weight loss in a sustained way, while boosting energy and maintaining pH balance in the bloodstream.
